Warranty Agreement

Warranty: Applied Strobe Technology Co. Ltd. (AST) warrants all assemblies to be free from defects in materials and workmanship, when used by the original purchaser under normal conditions, for a period of 12 months from the date of delivery.

AST's obligation under this warranty may, at it's option, be fulfilled by repair or replacement, without charge, of such assembly, or part thereof, which proves to have been defective. AST will have the option of requiring return of the defective assembly, or part thereof, (transportation to be prepaid by the customer/distributor) to establish the claim. AST will return the repaired or replaced assembly to the purchaser via prepaid ground transportation.

No other warranty, whether oral, statutory, or implied shall apply to AST assemblies. AST shall not be liable for loss of potential profit, or special or consequential damages of any nature whatsoever.

The warranty herein specified is subject to the condition that the purchaser and his (it's) agents and employees shall exercise proper care in the installation and use of the assembly. The purchaser has the responsibility to provide adequate warnings and instruction to ensure safe installation of the assembly.

Note: All assemblies being returned for repair must have a "Return Authorization" (RA) number marked on the outside of the package. Please call or email AST to obtain the RA number prior to returning the assembly.
